## Upgrade for NCAT Furnace

InstroTek® Inc.
innovators in instrumentation technology

# Upgrade Your Original NCAT Furnace
## with the **Advanced Electronics** of the InstroTek Ignition™ Panel.

**The InstroTek Ignition™ Panel** is a replacement front panel that upgrades the existing NCAT Ignition Furnace electronics and provides many new features that help make testing easier, faster, and more efficient. The Ignition Panel works with both new and older model NCAT furnaces.

The Ignition Panel increases the reliability and ease-of-use of the furnace and connects via Bluetooth to any Android smartphone, tablet, or PC. From the app, users can set many parameters, view real-time test data, get notified when test is complete, place the furnace in sleep mode... *and so much more!*

## FEATURES

- Meets **AASHTO T 308** & **ASTM D6307**
- Additional power surge protection and functionality
- Bluetooth enabled
- Large 7"color LCD touchscreen
- Keypad or touchscreen operation and verification

- USB Port for downloads and storage of test results
- Free Mobile App to view tests in real-time and email results
- Uses the existing printer
- Auto wake and sleep mode
- Does not affect %AC measurement results
- Increases reliability and operational efficiency

*Must be professionally installed.*
