Stick-On Check Source Holder: Model 4464-473

This product uses an industrial-strength adhesive to attach plastic laminate-type check sources up to 2.5 cm (1 in.) diameter to instruments. A two-part design sandwiches a check source between a base layer that is mounted directly to the instrument, and a cover layer with a clear window to permit reading of the check source label. The Stick-On Holder is available separately or with a check source or separately (see chart below). Other isotopes and sizes are also available.
